**NOTE:**

Do not use the device in an enclosed environment or where heat dissipation is poor. Prolonged work in such space may cause excessive heat and raise ambient temperature, which may lead to automatic shut down of the device. In your safety, in the case of such event, shut the device in a well-ventilated place before turning on for normal use.

**Getting to Know Your Device**

The following figure is only for your reference. The actual product may be different.

- External Antenna Connector
- SIM Card Slot
- OLED Screen
- Power Button
- USB Port
- MicroSD Slot
- MP3 Button

**NOTE:**  
● MicroSD logo **REGD** is a trademark of SD Card Association.

- Please use the original external antenna if necessary.

**Connection Overview**  
Your device supports two methods to go to Internet and supports multi-connections by surfing on the Internet at the same time. The following figure is only for your reference.

- **4G Mode** Use your 4G SIM card to access the Internet.

**Internet Wi-Fi Mode** Your device will connect to other WLAN device (routers, access points, etc.) via Wi-Fi to access the Internet.

**Internet:** The 3G/LTE device has already connected to the Internet.  
**NOTE:** The network shall be defined between your device and other WLAN device.

**Installing Your Device**

1. Insert the SIM card.

**IMPORTANT:** Your device does not support MicroSIM or any other non-standard SIM cards. To avoid device damage, please do not use them.

2. Insert the microSD card.
3. Open the microSD card slot.

**NOTE:** Do not pull the cover safety, as it is connected with the device.  
2) Insert the microSD card to the microSD slot. The following picture shows the correct inserting direction. You will hear a click when the microSD card fits in place.

**NOTE:** Please set the client to obtain an IP address automatically referring to the chapter "Configuring Your PC", and then the client will get an IP address for "192.168.1.10".

3. Select the SSID of your device, and then click **Connect**. The following picture is only for your reference.

**NOTE:** Please set the client to obtain an IP address automatically referring to the chapter "Configuring Your PC", and then the client will get an IP address for "192.168.1.10".

4. Input the password, and then click **Connect**.

**NOTE:**  
● There may require the password for Wi-Fi connection, please check the label of your device for the details.  
● Double press the **MP3 button**, and then the SSID and Wi-Fi key will display in the OLED screen.

5. Wait a moment, and then the client will connect to your device successfully.

**4G Mode**  
After the client connected to your device successfully, you can access the Internet in the **Automatic** or **Manual** mode. The default mode is **Automatic**.

Mode	Operation
<b>Automatic</b>	Your device will connect to the Internet automatically, and your device will start the connection.
<b>Manual</b>	Input the network configuration page, and select <b>Settings</b> > <b>Network Settings</b> > <b>4G Mode Settings</b> > <b>Mode</b> , and then click <b>Mode</b> > <b>Connect</b> > <b>Connect</b> .

**NOTE:** If you want to modify the detailed parameters of your device, please refer to the detailed configuration page by visiting http://192.168.1.1 or http://192.168.1.10.

**Internet Wi-Fi Mode**

1. Open the wireless configuration page.
2. Select **Settings** > **Network Settings**.
3. Set the **Internet Wi-Fi Status** and **Preferred Network**, and then click **Apply**.
4. Wait a moment, and then the client will connect to your device successfully.

**NOTE:** You need to enable the Internet Wi-Fi Status and select Wi-Fi.

**Accessing the Internet**

1. Connect to the device.
2. Power on your device.
3. The OS detects and recognizes new hardware and finishes the initialization automatically.

**NOTE:** If the Windows operating system does not finish installation automatically, you can run the installation program in path of **My Computer** > **ZTECORPOR**.

**NOTE:** You need to enable the Internet Wi-Fi Status and select Wi-Fi.

**NOTE:** You need to enable the Internet Wi-Fi Status and select Wi-Fi.

**NOTE:** You need to enable the Internet Wi-Fi Status and select Wi-Fi.

**NOTE:** You need to enable the Internet Wi-Fi Status and select Wi-Fi.

**NOTE:** You need to enable the Internet Wi-Fi Status and select Wi-Fi.

**NOTE:** You need to enable the Internet Wi-Fi Status and select Wi-Fi.

**NOTE:** You need to enable the Internet Wi-Fi Status and select Wi-Fi.

**NOTE:** You need to enable the Internet Wi-Fi Status and select Wi-Fi.

**NOTE:** You need to enable the Internet Wi-Fi Status and select Wi-Fi.

**NOTE:** You need to enable the Internet Wi-Fi Status and select Wi-Fi.

**NOTE:** You need to enable the Internet Wi-Fi Status and select Wi-Fi.

**NOTE:** You need to enable the Internet Wi-Fi Status and select Wi-Fi.

**NOTE:** You need to enable the Internet Wi-Fi Status and select Wi-Fi.

4. Connect to the WLAN device. There are two methods for your reference.

- Select the WLAN device from the WLAN list.
- Click **Add** input the WLAN device information in the **Add Wi-Fi Network** area, and then click **Apply**.

5. After your device connected to the WLAN device successfully, you can receive the Internet.

### Configuring Your PC

Follow the following steps and figures to configure PC to connect to the Internet.

1. Right-click **My Network Places**, and then select **Properties**.

2. Right-click **Internet Options**, and then select **Properties**.

3. Select **Internet Protocol (TCP/IP)**, and then click **Properties**.

4. Select **Obtain an IP address automatically** and **Obtain DNS server address automatically**, and then click **OK** to finish the configuration.

6. Turn your device off if necessary. Contact a technician or the manufacturer of the medical device before using your device.

- The device operates with 0V specification when the device is used at 100 from your body.
- Do not touch the metal location when using your device at places such as an installation or chemical factory, where there are no proper ground or explosion protection being provided. Turn off your device if required.
- The use of electronic transmitting device is forbidden in aircraft, power stations and in hospitals. Please observe any class of warning label on each of your device in these conditions.
- Do not touch the metal elements if not necessary. Otherwise it will affect your device performance.
- Avoid your device out of the reach of this radiation. Your device may cause injury if used as a TV.
- Do not touch the metal parts of your device so as to avoid a burn, when your device is working.

### Warning and Notice

#### To the Owner

- Some electronic device are susceptible to electromagnetic interference with your device if inadequately shielded, such as the electronic system of vehicle. Please contact the manufacturer of your device before using if necessary.
- Operating your device may interfere with medical device like hearing aids and implantable. Please observe them from time that all instructions away from such medical device when they are turned on.

7. Avoid using your device near or inside metallic structures or installations that can emit electromagnetic waves. Otherwise it may influence signal reception.

- Your device is not waterproof. Please keep it dry and store in a dry and cool place.
- Do not use your device immediately after a sudden temperature change in each case, it will produce new noise and reduce your device use start time 1 and 2 hours only.
- Handle your device properly. Do not drop, bend or strike it. Otherwise your device will be damaged.
- Do not use your device if you are professional and only qualified technicians can perform repair work.
- Operating temperature range of 0°C - 45°C and humidity range of 10% - 90% are recommended.

### About your Adapter

Adapter shall be installed near the equipment and shall be easily accessible.

Model: **ZTE 4916P**

Manufacturer: **ZTE Corporation**

The plug connector or disconnector device of adapter.

### Using Battery

- Do not short-circuit the battery, as this can cause excessive heat and fire.
- Do not dispose the device in fire areas or dispose of it in a fire to avoid explosion.

- Do not disassemble or modify the battery.
- Remove any any charger or battery damaged or worn out.
- Discharge the used and battery to the provider or send to the approved recycling place. Do not mix it in the household waste.

Do not change the built-in non-rechargeable battery of your device if you need. The battery can only be changed by ZTE or ZTE authorized service provider.

### Liability Warranty

This warranty does not apply to defects or errors in the Product caused by:

1. Misuse or abuse.
2. Use of non-recommended, unapproved, or counterfeit components or accessories.
3. Operation of the Product in violation of the instructions or procedures.
4. Modification or repair or made by ZTE or ZTE-authorized technician.
5. Power failure, surges, fire, flood, accidents, actions of third parties or other events outside ZTE's reasonable control.
6. Usage of third-party products, or usage in conjunction with third-party products provided that such defects are due to the manufacturer's original design.
7. Any other cause beyond the scope of normal usage intended for the Product.

Each User shall have the right to report or return the Product, or request a refund for the Product from ZTE, under the device construction guarantee.

- This warranty is not valid to some extent when ZTE can identify for defective or nonconforming items, and is in line of all other warranties, expressed, implied or statutory, including but not limited to the original warranties of merchantability and fitness for a particular purpose, unless otherwise required under the applicable procedure of law.

### Limitation of Liability

ZTE shall not be liable for any loss of profits or indirect, special, incidental or consequential damages resulting from or arising out of or in connection with using of the product, whether or not ZTE has been advised, aware or should have been aware of the possibility of such damages, including, but not limited to, lost profits, interruption of business, cost of capital, cost of installation, failure or product, or any consequential cost.

### Troubleshooting

Problem	Suggested Solution
Can not establish the Wi-Fi connection between your device and client	<ul style="list-style-type: none"> <li>• Verify that the Wi-Fi function is active from the Wi-Fi button on either PC or device.</li> <li>• Make sure that you are within the range of the Wi-Fi connection.</li> <li>• Check the IP address to make sure you are on the same IP address as all devices participating in the network protocol (TCP/IP) configuration. To do the correct network key (WPA-PSK) when you connect to the device.</li> </ul>
The client connected to the device can not receive the Internet	<ul style="list-style-type: none"> <li>• Change the location to find a place with good signal.</li> <li>• Check Wi-Fi Connection mode setting.</li> <li>• Contact with your service provider and confirm your APN settings.</li> </ul>
Phone can not connect to the Internet	<ul style="list-style-type: none"> <li>• Make sure the other WLAN device has already connected to the Internet.</li> <li>• Make sure that the network of your device and the other WLAN device is different.</li> </ul>
Can not receive the Wi-Fi configuration key	<ul style="list-style-type: none"> <li>• Refer to the manual network. The network key shows in My WLAN 100.1 or My WLAN device key page.</li> <li>• Do not use any proxy server.</li> </ul>
