(Gosund)

▶ Connect with Your Cellphone
Requirements: 2.4GHz Wi-Fi condition at home

For 2.4Ghz Wi-Fi You'll Need to Know:
1.If you only have 5GHz Wi-Fi router,you will not be able to complete the connection.
2. If you are using a dual Wi-Fi router and it broadcast 2 Wi-Fi signals, make sure that your phone was connected with the 2.4GHz Wi-Fi signal, it should be the Wi-Fi signal that next to "_5G" .
3. If you are using a dual Wi-Fi router but it broadcast only 1 Wi-Fi signal, you will have to manage your Wi-Fi router and change the settings to have 2.4GHz Wi-Fi.
---> Choose the "+" symbol,

A: For Easy Mode Connection- Blue ndicator Light Blink Rapidly (Twice a second).

---> Confirm that the smart switch is well installed
---> Open Gosund app

---> "Socket"

▶ **Trouble Shooting**
Q: Why my phone connection failed ?
A: * You should try both Easy Mode and AP Mode, read page 6-page 14, make sure to follow the guide and try again.

* Confirm your home Wi-Fi is 2.4GHz and you entered the correct password during the connection.

* Remove&Install the smart switch to start again, see what happens. Contact the after sales service for further help if you still have problems with the connection after following the steps above.

Q: Why can't I voice control it with my Alexa/Google?
A: * Make sure you set up smart switch successfully on Gosund app, and they are working fine.

* Make sure you put correct account when you link Gosund as a skill on Alexa/Google App, and you can find it on your skills.

* Make sure your Alexa/Google device is working fine.

* Check the device names that you set for this smart switch, it should be non-repetitive and recognizable for voice assistant, Also, please make sure your native language is available for Alexa.

If you still having trouble to voice control our smart switch after followed all

instructions, do not hesitate to contact us for help.

Q: Do I need to set up the device again if I changed my router?
A: Yes! you must set up the smart switch again if there is any change of the current Wi-Fi status, either you changed your router or you moved the device to a new house. However, you don't need to worry if you are just moving it inside your room, with the same Wi-Fi.

Q: Why does it turns on/off or comes offline surprisingly ?

A: Check your Wi-Fi status and make sure the electricity is fine.
Check if you've set timer for it.
If everything looks alright, just reset the smart switch on your app again and see what happens.
Email to after-sales services if this problem still exists.

▶ **Safety Information**
This device is for Indoor&Dry condition use only. Make sure the switch electricity is correct for the appliances that you attempt to use with. Do not try to

After that you will see the smart switch in the home page of Google Home as "Linked to you",but you still haven't set the device name and assign a home or a room for it.

Now click the device that "Linked to you" or open "Works with Google" again to manage your linked devices, follow the steps below and set up the device

names, rooms and home for the smart plug, you won't be able to voice control it before you complete that.
